Introduction

A topic is a top-level OPI reporting category that holds a collection of OPI measures. The topic reporting package is a topic specific report containing graphs and tables for only those measures that exist within the desired topic area. This report will provide historical statewide data for the topic area and its measures as well as the specific district data for the current month. In order to find historical district data for a given topic area or measure you will need to view the district report for the desired month
